*Green Frame Series*

SUS

# So free, so clean.

Tubular aluminum frames offer unlimited possibilities for system creation.

GF-series structural aluminum frames have been designed as a material for work boards, trolleys, chuters, and racks, to offer the optimum adaptability to factory automation.

Its unique sectional form is most suited for simple and fast assemblies and modifications with use of a single bolt. This offers the maximum flexibility to unexpected additions and layout changes frequently required in manufacturing sites.

The lightweight aluminum frame, with elegant alumite treatment, will help you to maintain aesthetic appearance of the factory for long. What's more, the aluminum is an excellent material for recycling and reuse.

Perfect freedom to choose the best combination of frames and accessories allows for a customized system that will satisfy your needs.

Environment-conscious and human-friendly.  
Green frames support varying kinds of factories.

Increased productivity with reduced  
man-hours for assembly

## Easy to assemble

GF Frames are best suited for setting up work boards and chuters without complicated steps. A single bolt is used to tighten or loosen joint connectors, for easy assembly and disassembly.

---

All frames and connecting parts are  
made of aluminum

## Lightweight

Frames and connectors made of lightweight aluminum, with only one third of steel density, allow for creation of extra-light systems. The superior mobility of aluminum chuters and trolleys will reduce workload of your employees.

---

Environment-friendly with recycling and reuse

## Recycling

Aluminum is a highly recyclable material. Disposal can be made easily because connecting parts are also made of aluminum. In addition, the GF series, with the use of bolts for connection, is a reusable system that makes simple assembly and disassembly possible.

---

Versatility with varying accessory parts

## Multi-functional

GF series can be used for a wide variety of applications. Varying combinations with joint and/or accessory parts allow for addition of diverse functions to work boards, chuters, trolleys, racks, partitions, and clean booths. As parts can also be mounted after assembly is once complete, the GF series will meet needs for unexpected modifications.

---

**GF**  
Green Frame

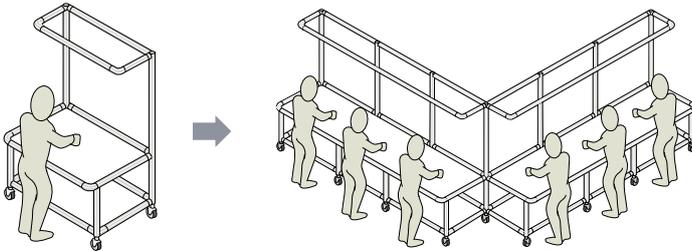

# A broad range of applications are available to meet individual needs.

## Example 1 Work board

### Easy to modify layout

Work board combination can flexibly be modified according to working space and staffing conditions of a cell production system. Individual work boards can easily be connected for line works, and vice versa.

Individual work board for one person

Connected work boards for line work

## Example 3 Trolley

### Reuse with easy disassembly

Convenient for transport of parts and works. The lightweight aluminum frames reduce operator workload and offer freedom to modify size as well as shape of the composition.

# GF-series aluminum frames and resin-coated steel frames

## 1 Environment

### GF

- Great recyclability
- While resin-coated steel frames are difficult to reuse, GF-series aluminum frames achieve a superb recyclability.

3 Standard Frame Sizes are available

## 3 Weight

Resin-coated steel frames

400 g

- Frame: 520 g/m
- Metal joint: 145 g

Weight reduced by 40%

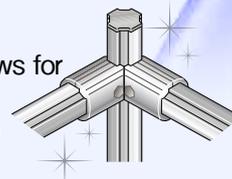

230 g

- Frame: 367 g/m
- Multi connector: 61 g

## 4 Aesthetic

### GF

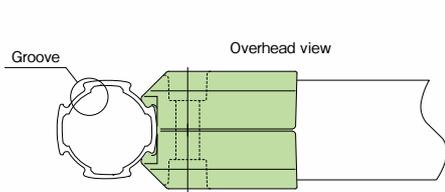

Alumite treatment allows for "maintenance-free", excellent appearance that lasts for long.

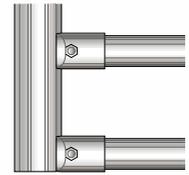

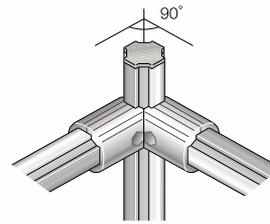

### Resin-coated steel pipes

Resin-coating causes resin deterioration and dust generation

## 2 Assembly time shorter by 2/3 (SUS data)

The frame is equipped with a pair of grooves in each of the four directions. A connector can fit in the grooves with use of a single bolt.

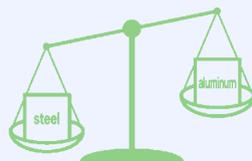

Degree of perpendicularity and parallelism is apparent with use of grooves facing the four directions.

## Green frame features

Green frames and connectors are made of aluminum

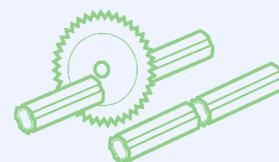

### Aluminum weighs one third of steel

Increased speed enabled by the lightweight tools results in high efficiency (a green frame weighs two thirds of a steel and plastic frame).

### Quick to deliver

We respond to urgent orders.

### A broad range of sizes available

Length can be selected within a range between 100 and 4,000 mm.

Green frames will be delivered with all parts necessary for the desired unit.

# WORK BOARD Work Board A Normal Type

## Work Board A Normal Type

### For sitting work

Load capacity: 100 kg

\* W900 type

Name	Work Board A for Sitting Work (H=740)		
W(mm)	750	900	1200
Item number	<b>GFM-001</b>	<b>GFM-002</b>	<b>GFM-003</b>

#### Components

**Frame:** Green Frame

**Connector:** Multi Connector Inner Type, Free Connector Inner Type

**Top board:** Work Board t=16.5 (Particle Board and Rubber Mat), Board Holder

**Bottom:** Foot Connector M12 (resin type) x 4, Adjuster M12 x 4

\* For conductive and/or RoHS-compliant types, please contact.

### For standing work

Load capacity: 100 kg

\* W900 type

Name	Work Board A for Standing Work (H=900)		
W(mm)	750	900	1200
Item number	<b>GFM-004</b>	<b>GFM-005</b>	<b>GFM-006</b>

#### Components

**Frame:** Green Frame

**Connector:** Multi Connector Inner Type, Free Connector Inner Type

**Top board:** Work Board t=16.5 (Particle Board and Rubber Mat), Board Holder

**Bottom:** Foot Connector M12 (resin type) x 4, Adjuster M12 x 4

\* For conductive and/or RoHS-compliant types, please contact.

### For moving work

Load capacity: 100 kg

\* W900 type

Name	Work Board A for Moving Work (H=840)		
W(mm)	750	900	1200
Item number	<b>GFM-007</b>	<b>GFM-008</b>	<b>GFM-009</b>

#### Components

**Frame:** Green Frame

**Connector:** Multi Connector Inner Type, Free Connector Inner Type

**Top board:** Work Board t=16.5 (Particle Board and Rubber Mat), Board Holder

**Bottom:** Frame Caster  $\phi$ 75 x 2, Frame Caster  $\phi$ 75 with Brake x 2

\* For conductive and/or RoHS-compliant types, please contact.

## Multi Connector Outer Type

**Material/Technical data**  
**Material:** Aluminum die-cast  
**Environment:** RoHS compliant  
**Weight:** 61g

- Most units can be built just using multi connectors only.
- Simply tighten the bolt with a wrench.

Name	Multi Connector Outer Type
Item number	<b>GFJ-000</b>

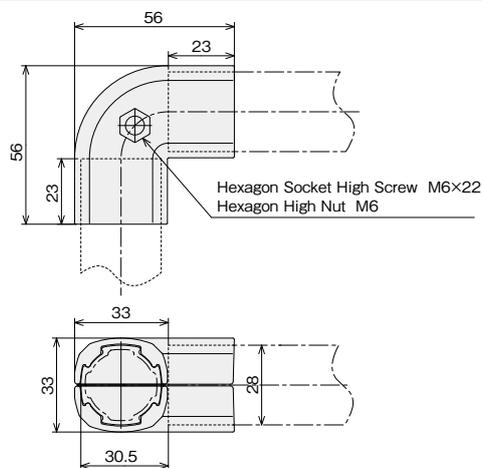

## Angle Connector Outer Type

**Material/Technical data**  
**Material:** Aluminum die-cast  
**Environment:** RoHS compliant  
**Weight:** 96g

- Use for a right-angle corner.

Name	Angle Connector Outer Type
Item number	<b>GFJ-005</b>

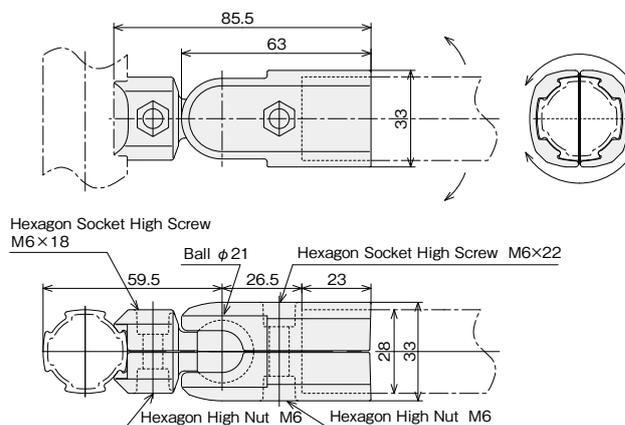

## Free Connector Outer Type

**Material/Technical data**  
**Material:** Aluminum die-cast  
**Environment:** RoHS compliant  
**Weight:** 127g

- Parts such as reinforcing stays can be attached at a desired angle.

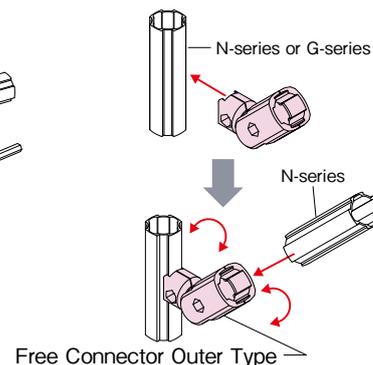

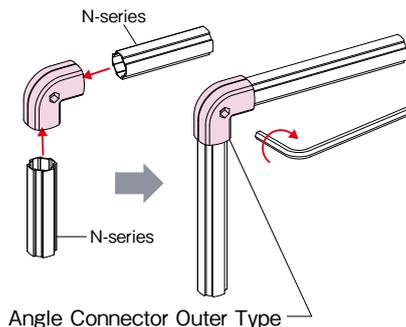

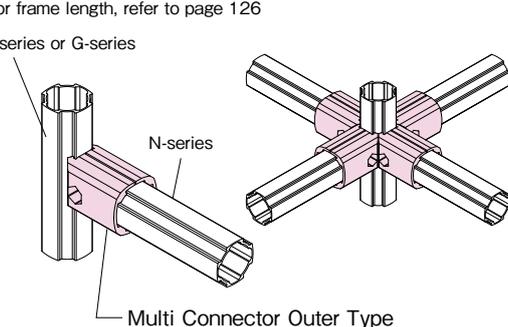

Name	Free Connector Outer Type
Item number	<b>GFJ-002</b>

## Name Plate Kit

### Material/Technical data

**Name Plate**  
**Material:** Polypropylene (gray)  
**Environment:** RoHS compliant  
**Weight:** 17 g(300 mm)·87 g(1550 mm)

**Name Plate Cover**  
**Material:** ABS transparent  
**Environment:** RoHS compliant  
**Weight:** 12 g(300 mm)·59 g(1550 mm)

Name	Name Plate Kit L=300	Name Plate L=1,550	Name Plate Cover L=1,550
Item number	<b>GFK-J00</b>	<b>GFA-806</b>	<b>GFA-807</b>

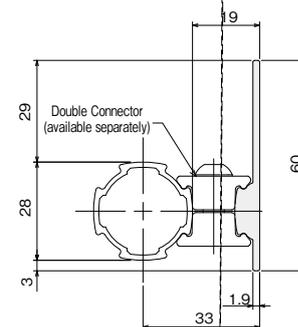

## Aluminum Name Plate

### Material/Technical data

**Material:** Aluminum extrusion  
**Environment:** RoHS compliant  
**Weight:** 101 g

- Use a double connector for installation to a frame.
- \* Corners are processed with R3-rounding
- \* Double Connectors must be purchased separately

Name	Aluminum Name Plate (L=205)
Item number	<b>GFA-A12</b>

## Hang Hook Connector

### Material/Technical data

**Material:** Aluminum extrusion  
**Environment:** RoHS compliant  
**Weight:** 23 g

- Used for hook on and fix frames

\* Mounting direction is only as illustrated at right hand

Name	Hang Hook Connector
Item number	<b>GFJ-A30</b>

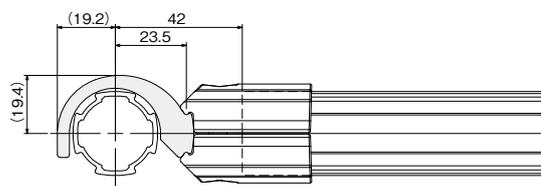

## Hook Connector R

### Material/Technical data

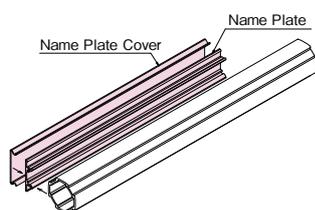

**Material:** Aluminum extrusion  
**Environment:** RoHS compliant  
**Weight:** 23 g

- Use to hook frames.

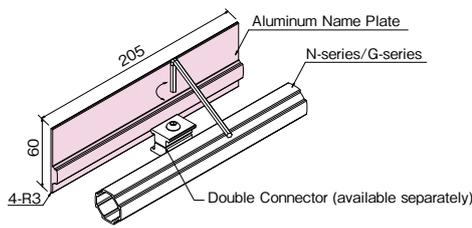

Name	Hook Connector R
Item number	<b>GFJ-A32</b>

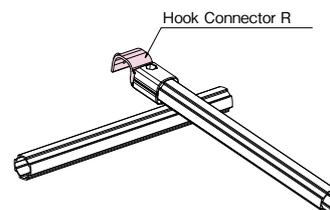

## Installation

Name Plate/Name Plate Cover

Aluminum Name Plate

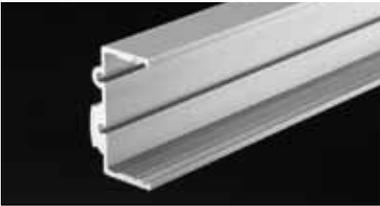

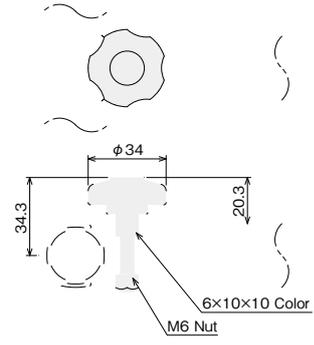

• Connector that hooks and fixes frames.

### Board Level Kit

#### How to use

Use to loosen the three hand

#### Design standard

**Note:**

- Values with \* are sizes of unit products using N-series frames (28 mm). For A, use outer-type multi d
- Table height can be adjusted in three levels within 20 (minimum pitch is 40 mm).
- Up to six adjustment levels are available when Hook items are used.
- For assistance, please contact.

# Board Lifter Kit

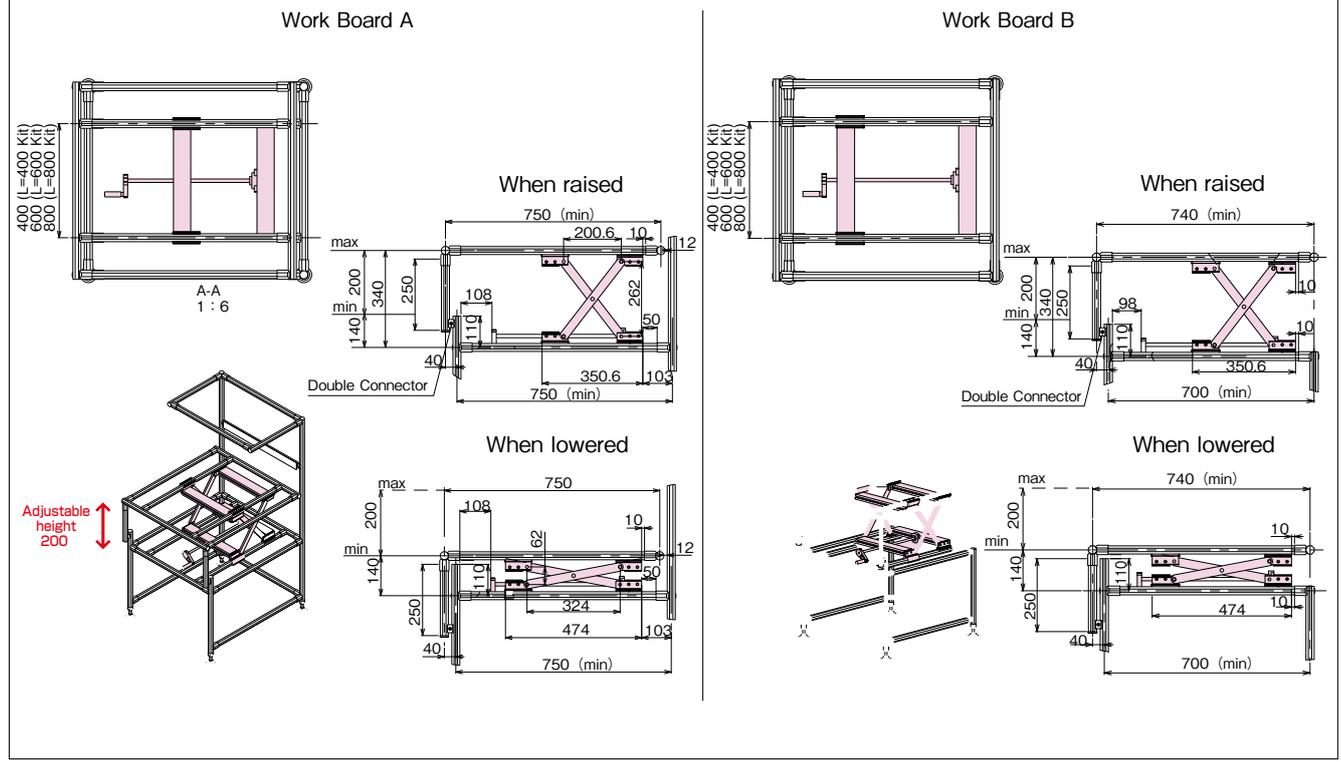

## How to use

Just rotate the handle to rise or lower.

## Design standard (example)

## Cable Duct

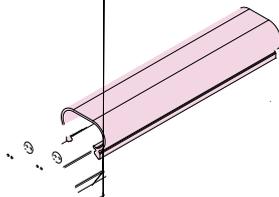

## Cable Lock

## Installation

- Use to store cables.
- Can be installed to a frame with one-touch operation.

- Use to fix cables.
- Can be installed to a frame with one-touch operation.
- Cable band is not included.

## ■ CAD Drawing service

Just send a draft sketch with dimensions to get a 3D-drawing with a list of necessary materials/parts.

## ■ Assembly service

Delivery of assembled products is also available.  
(Assembly/shipping costs will be charged separately)

\* If delivery of assembled products is required, please notify in the Order form.

## Introduction

We've lived on and benefited from the earth in so many ways.

However, environmental issues, such as global heating and pollution, caused by our economic activities are now so serious that the earth's regenerative capability has almost reached the limits.

Today, we need to realize the situation we are in, review our economic activities and material civilization, and work on the development of a sustainable society.

SUS Corporation addresses the global environmental protection as a key issue. Among our corporate principles, "Strive for effective utilization of the limited natural resources, and product manufacturing in harmony with environmental protection and the nature, with utmost effort toward the reuse of materials" bases on the spirit of environmentalism to protect resources.

With aluminum as an emblem of peace, SUS contributes to reduce environmental burden by developing and manufacturing standardized, earth-conscious products.

SUS prioritizes the use of parts and materials that generate minimum environmental burden, and promotes manufacturing of "RoHS-compliant" products.

Based on this philosophy, SUS has supplied high-quality products, at a reasonable price, with prompt delivery. And now, while maintaining the same service quality, SUS is proud to offer green and environment-friendly products.

# About RoHS

## What is RoHS

- 1 RoHS EU directive on the Restriction of the certain Hazardous Substances in electrical and electronic equipment
- 2 RoHS, a directive that defines and restricts the use of certain hazardous substances, was adopted in February 2003 by the European Union, and came into force on July 1, 2006. This Directive bans the placing on the EU market of controlled substances, with some exceptions. Products containing more than agreed levels of any of the controlled substances could be subject to product recall. The product, then, will practically be shut out from the European market.
- 3 RoHS restricts the use of the following six hazardous materials in five types:
  - 1)Lead
  - 2)Mercury
  - 3)Cadmium
  - 4)Hexavalent chromium
  - 5)Brominated flame retardants (PBB, PBDE)

For details, refer to the original "Environment Update" statement, from WEEE Handbook V, issued by Japan Machinery Center for Trade and Investment, in March 2003

### Article 2 Scope

3. This directory does not apply to spare parts used for repairing of electronic and electrical equipments, or reusing of electronic and electrical equipments, released before July 1, 2006.

### Article 4 Prevention

1. Member nations are obligated to ensure that electronic and electrical equipments on the market, on July 1, 2006 and after, do not contain more than the specified amount of lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls, or polybrominated diphenyl
2. This provision does not apply to use applications listed in the Appendix. ("This provision" means provision 4.1)

### Appendix

Usage of lead, mercury, cadmium, and hexavalent chromium exempted from Article 4-1

1. Mercury contained in small-sized fluorescent lamps, that does not exceed 5 mg
2. Mercury contained in general-use straight fluorescent lamps, that does not exceed the following
  - Halphosphate 10 mg
  - Triphosphate with normal lifetime 5 mg
  - Triphosphate with long life time 8 mg
3. Mercury contained in straight fluorescent lamps for special purposes
4. Mercury contained in lights other than those specified in the Appendix
5. Lead contained in glasses used for cathode-ray tubes, electronic components, and fluorescent tubes
6. Lead content of up to 0.35 wt% in steel products, up to 0.4 wt% in aluminum materials, or up to 4 wt% in copper materials as alloy content
7. Lead contained in high-melting point solders (tin or lead solder alloy containing more than 85 % of lead)
  - Lead contained in solders used for switches, signals, or networks for electrical transmission, infrastructure device, and communication management
8. Surface treatment using cadmium, other than those restricted by directives 76/769/EEC, and revised 91/338/EEC on use and release of hazardous substances and their prescriptions
9. Hexavalent chromium used in vapor absorption refrigerator's carbon steel cooling systems for anticorrosion purposes

The threshold values, or allowable content ratio, of the hazardous substances restricted by RoHS is defined in the "Environment Update, Vol. 5, No.5", issued in January 2004, by the Japan Machinery Center for Trade and Investment, as follows:

A concentration value of up to 0.1 % by weight in homogenous material for lead, mercury, hexavalent chromium, PBB and PBDE, and of up to 0.01 % by weight in homogenous material for cadmium will be permitted. Homogeneous material means a component or material that cannot be mechanically disjointed into different materials by unscrewing, cutting, crushing, grinding, abrasive processes and similar procedures.

Therefore, surface treatment, such as plating, chromating and coating, are regarded as an independent homogeneous substance from the base material. (0.1 % is equivalent to threshold amount of 1000 ppm in the "Survey of the Ratio of Substances in Materials Delivered that Pose Risk to the Environment")

### Attachment 1: Examples of content of the six hazardous substances restricted by RoHS

Materials and parts that may contain any of the hazardous substances restricted by RoHS are as follows:

- 1) Polybrominated biphenyl (PBB)
- 2) Polybrominated diphenyl ether (PBDE)

Description	Organic brominated compounds
Restricted items	1 Flame retardants applied, for any purpose, to plastic items including plastic moldings and all types of cables

### 3) Hexavalent chromium (Cr.+6) compounds

Description	All substances, such as organic/inorganic compounds or salts, that base on hexavalent chromium [Chromium metal and chromium contained in alloy are exempted]
Restricted items	1 Packaging material for products and parts transport (refer to additional items on packaging materials below)
	2 Anticorrosive coating for plating surfaces, including chromate and alodine treatments.
	3 Colorants such as ink and coating materials
	4 Leather products and tanning agents

### 4) Lead (Pb) and its components

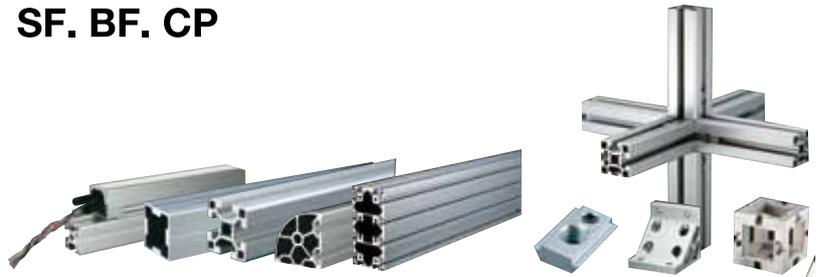

Description	All substances, such as metal, alloy, organic/inorganic compounds or salts, that include lead element
Restricted items	1 Packaging material for products and parts transport (refer to additional items on packaging materials below)
	2 Coating materials, colorants, and ink, used for printed-wiring boards, that contain lead.
	3 Small sealed lead battery (excluding SR44)
	4 Surface treatment for electronic external electrodes and lead terminals (including solder plating and spare solder for harness)
	5 AC adapters, power cords, connecting cords
	6 Stabilizers, colorants, and coating materials contained in plastic and rubber materials.
	7 Coating materials Ink
	8 High-melting solders for parts/device connectors (with lead content of 85 wt% or more)
	9 Electronic ceramic parts (piezoelectric materials, dielectric materials, magnetic materials—ferrite)
	10 Optical glasses, filter glasses, liquid-crystal glasses
	11 Electroless-nickel plating, stabilizers used for electroless-gold plating, lead used for additive agents,
	12 Glass materials used for electronic parts and fluorescent display tubes (Glass materials used for electronic parts: resistive elements, conductive pastes, adhesives, glass slits, sealants, etc.)
	13 C4: controlled, collapse, chip, connection Soldering paste
	14 Alloys that contain lead exceeding the following allowance concentration (including soldering materials) <ul style="list-style-type: none"> <li>•Steel: less than 0.35 wt%</li> <li>•Aluminum alloy: less than 0.4 wt%</li> <li>•Copper alloy: less than 4 wt%</li> <li>•Solder: less than 1,000 ppm</li> </ul>
Measuring method	1 Inductive connection: plasma emission spectroscopy device (ICP-AES, ICP-OES) Example: EN ISO 11885:1998
	2 Atomic absorption spectrometer (AAS) Example: EN ISO 5961:1995
	3 Inductive connection: plasma mass spectrometer (ICP-MS)
